GALLERY® STEEL

The Gallery® Steel three-layer construction provides exceptional strength, energy efficiency and dent resistance as well as a beautiful carriage house appearance. The 2" or 1-3/8" thickness of Intellicore® polyurethane or bonded polystyrene insulation and thermal break makes these doors heat and cold resistant while the tongue-and-groove joint helps seal out wind, rain and snow. Available in short and long panels with multiple window options, the three-layer Gallery® Steel is virtually maintenance-free, so the first fabulous impression becomes a lasting impression.

intellicore®
insulation technology

Warmer. Quieter. Stronger.

Gallery® Steel garage doors featuring Intellicore® insulation technology represent the ultimate smart choice for homeowners. Clopay's Intellicore® insulation is a proprietary polyurethane foam that is injected into a garage door, expanding to fill the entire structure. The result is a door with incredible strength and durability. Its dense insulation also produces a quieter door, and with one of the industry's leading R-values of 18.4, it provides year-round comfort and improved energy efficiency. Smart, indeed.

THE BEAUTY OF STAINED WOOD WITHOUT THE UPKEEP

Clopay's Ultra-Grain® finish delivers the best of both worlds: the realistic look of natural wood with the low maintenance and energy efficiency benefits of insulated steel. But unlike real wood, it's UV-resistant and impervious to moisture, so it won't fade, rot, split, shrink or crack, saving you and the environment material, energy and resources necessary to maintain or replace door components.
